Its a card game first, and a fighting game second. Each fight is structured by the cards played. And by 'cards', I mean a 52 card deck.

Your attacks come in the form of stacks of five such cards. Following Yahtzee Croshaw and Poker rules, getting say, a 5-of-a-kind will increase the damage that can be dealt.

The end all goal, of course, is to slay whoever you're fighting.

Artwise its beautiful, but the lore of the game is handed to you via text, and wayyyyy too much of it.

8/10. Poor controls, and gameplay wounded any chance the game would carry me through on story. Spent no longer than 10 minutes on it. Wouldn't recommend it to anyone.. Okay, as a start, I don't hate this game, on the contrary. I'm doing a search for the worst rated games on steam, and I came acrossed this game, because of the user rating. I don't see why this game was as bad as stated. In fact, I liked it! Please keep working on this premise, and fix some of these faults. Heres a quick run through of some problems I saw, you can correct me if I just missed something:

-A drawer that I found at the start said that it was locked, I found a key. So I made a rightful assumption saying the key was for the drawer. Well, I spent a total of 5 minutes trying to find out how to use the key. 'I' was for inventory, I knew, but when I was trying to use the key for the locked drawer, I didn't know that the key for the door was for the door, not the drawer.

-(dumb nitpick) the walls sometimes clip through other walls, the walls are paper thin, and the flashlight doesn't shine on some things, and the text on the notes don't fit. But none the less this is a simple thing that I don't really care about. I'm just mentioning so it's known.

-Some people are pointing out grammatical errors, but I still know what's supposed to be said so I don't mind it. (I'm a fluent English speaker and my grammar can be just as bad so I don't see what the big deal is)

-Sometimes random sound effects would play.

-Apparently there was some intro? I'm not too sure but I thought someone said there was an intro explaining why you were in the hospital.

That's really all I saw that I didn't like, moving on to what I liked:

-All the mechanics included (though kinda pointless objectively) to duck left or duck right.

-I like the options to alternate between the flashlight and the nightvision, giving more options to survive.

-One thing that I wish was still in the game: the bugged AI. While watching the trailer, I laughed so hard when I saw the jumpscare at the end! It's something that I wish could be added back into the game just to take us out of the game for a minute. Without the funny jumps, the game just takes itself too seriously.

-I got the game for only 89 cents, that's pretty neat.

-It's a standard horror game, but it does create a creepy atmosphere, and has a nice premise.

-This game isn't like other washed down games that wouldn't even give the player a flashlight/night vision, this relies on actual horror not just a lack-of-sight type game.

In conclusion, if the description I gave of this game convinces you of this game, then get the game while it's on sale. I hope the developer might see this post and improve the features mentioned in my complaints.. More like boring game-bow
Honestly though, got old fast imo. Spoilers in the DLC description.. I remember the first time i bought this game, dad had to buy it for me since i was underage, i was so intrigued and fascinated at how there could be so much blood and violence and cussing in one game. It also introduced me to Cypress Hill. This game is a GEM and belongs in every hardcore FPS players collection. 10 outta 10!!!. Honestly... This is horrible, don't bother wasting your money. I wish I could get my money back... This isn't even a good sort of simulator.... not to bad,

Some logic, a few timing and luck. Mostly trial and error. And its fun.. I have more fun with this game in 72 minutes than I have with a game that's eight ♥♥♥♥ing hours.

Ueber game > GTA V. A beautiful soundtrack recommended to everyone that enjoyed Oddworld: Abe's Oddysee and want to listen to the musics at anytime. Purchased it to support the developers and their development of Oddworld: Abe's Exoddus' remake, in which I am looking forward!. Don't let my short palytime fool you, I played literally hundreds of hours of this back on Windows 3.1 I followed the saga of Chuck fighting to get the rights back for years and was active in the community for making levels for this game. I am so thrilled that Chuck was able to get not only the rights to release the sequel but also to re release the original on steam as well. I honestly just heard about these today via the Lazy Game Review video on Youtube and was blown away I thought all was lost and there was no hope so I immediately bought all of the games including the 3d one. Anything to support Chuck the man deserves it after all those years.

As to this game, it's as amazing as it ever was, I love the level designs and many really wrack your brain. THIS is how you make a puzzle game. The controls are tight (actually better than they were on Windows 3.1) and palyibng this briis back so many memories. But it's not rose colored glasses talking, this game really is that good.. A lot of the reviews are using the word 'creepy'. Yep.. Short, but beautifull! would love to see more and longer experiences like these!.. Anyone got the bug where the wheel breaks the door in 4 pieces and one of them blocks the level exit without any means to move it..? Shame.. nice graphics, cool ambiance but.. WTF bug... Can't quite wrap my mind around how they drive on the left side of the road, then 2 roads ahead its the right side, then its the left side again then its the right then left then right then left then right. Thank god I don't live in NYC.
